

RIDGEWAY

Ridgefence Nylofor 3M Plus

Our Nylofor 3M Plus fencing system is a single wire mesh panel system, having mesh apertures off 200mm horizontally and 25mm vertically, constructed from 5.0mm wire diameter.

Panels are fitted to posts with 25x5mm slotted clamp bars and M8x40mm stainless steel button head security bolts, posts are capped with a flat 60x60mm plastic insert.

Panels are 1730mm high x 3000mm wide.

Coating techniques

Panels made out of galvanised wires. A pre-treatment process guarantees a perfect PVC-coating adhesion to the product surface. The posts are in- and outside galvanised (min. coating 275g/m², both sides together), in accordance with Euro norm 10326. Afterwards an adhesion coating is applied and finally the posts are plastic coated (min. 60 micron).
